INTRODUCTION

The Municipal Census Program has been coordinated by the Calgary Regional Planning Commission for each of the past thirteen years. The Program is offered to municipalities within the CRPC's planning area and is intended to provide up-to-date demographic information for participating centres.

Fourteen municipalities conducted an enumeration in 1989. In each case, the municipality was responsible for hiring census takers and overseeing the enumeration. The CRPC's Regional Planning Services was responsible for tabulating and analysing the results and preparing summaries for each centre. Copies of these summaries are available from the municipality or through Regional Planning Services at the CRPC.

The 1989 Census Program: Selected Comparisons summarizes the most recent census information for all the municipalities within the Calgary Region. More detailed information is available at the CRPC offices:
